SHUNTEX - XMA

HIGH CONZ LEVELING DYE BATH SEQUESTERING & SOAPING AGENT FOR CELLULOSE

SHUNTEX XMA is the latest development of high konz co-polymer mixture. It is used to improve dyeing leveling dye bath sequestering & soaping performance of reactive or direct dyes for cellulose and cellulose blends.

Chemical properties:

Appearance	: Brown liquid
Component	: high Konz Co-polymer mixture.
Ionicity	: anionic
pH	: 4 ± 1 (1% Solution)
solubility	: soluble in water

Characteristics:

- SHUNTEX XMA is able to dissolve direct and reactive dyes
- It shows excellent leveling & dye bath Sequestering effect and prevents staining on the dyeing machine when dyeing direct and reactive dyes.
- It shows excellent soaping effect.
- It solves the un-leveling problems and provides better reproducibility for all in process. It simplifies the dyeing process, improve product quality and stabilizes the operation.
- SHUNTEX XMA can effectively overcome the leveling problem of dyestuff agglutination and colour difference between inside and outside of the yarn package.
- SHUNTEX XMA dose not affect the desired color of dyeing.

Application: SHUNTEX XMA 0.1g/l

Package : 200kg/120/60 plastic bucket
