

fortres flex

***fortres flex* is an ecologically advanced formula with anti-backstaining action, for the treatment of stretch garments**

Physical and chemical characteristics

Composition:	Formulation of alkyl-polyethylene-glycolethers in water
Appearance:	Clear colorless liquid
pH:	7 ± 1
Ionic charge:	Non ionic
Foaming power:	Moderate
Compatibility:	Always check the compatibility in conditions or with products other than the ones here suggested.
Storage:	Stable for 12 months in normal storage conditions, kept in its original packaging hermetically sealed.

Applications

fortres flex find application in the various phases of stretch garments washing, with actions that can vary depending on the treatment it is used for:

- wetting action in desizing treatments
- dispersion and suspension of color during stone-washing of garments
- detergency both in neutral and moderate alkaline conditions.

fortres flex performs even at low temperature and contains a selection of innovative ingredients that makes it effective to protect the elastane fiber.

Conditions of use

Conditions of use are variable and depends on those ones normally specified for the products and the processes run.

Treatments with *fortres flex* can be performed in a

wide range of conditions: both in hard and in soft water, with excellent stability from slightly acid to moderate alkaline pH.

Dosages

Dosages can vary depending on treatment and type of fabric. We recommend the use of quantities from 0,4 to 1,2 g/L of product.

Notes

It is always advisable to run preliminary tests to verify the possibility to achieve the final required results, taking into consideration the type of fabric and the employed process.

For details about recommended dosages and methodology to follow for a correct product application in conditions different from those ones here mentioned, we kindly invite our customers to contact our technical assistance service.

We kindly ask the customers to get in touch with our technical assistance service for anything not expressly reported in this booklet.

This booklet integrates the safety card without substituting it. The information refers to the knowledge of the product on the date of shipment. This product must be kept, handled and used according to the safety and hygienic regulations of a fair industrial practice and according to the laws in force. Considering the many possibilities of use and the eventual interference due to causes not depending on the distributor, it is not possible for us to assume any responsibility about the reported instructions. The technical information contained in this booklet is the result of accurate and extensive research. However it must be considered as indicative only, to be adapted to single cases, without warranty on our part.
