

BELFASIN OZK-TR

Ozone protector softener

BELFASIN OZK-TR is an especial softener for the protection of denim garments against ozone fading.

PRODUCT FEATURES

- ◆ Protects indigo-dyed denim against ozone fading.
- ◆ Imparts a soft and natural handle to denim-articles.
- ◆ No yellowing at usual drying temperatures.
- ◆ It lends superficial smoothness and high antistatic effect.

COMPOSITION

Quaternary fatty acid derivative

TYPICAL PROPERTIES

Appearance:	White liquid
Ionic nature:	Cationic

APPLICATION

Application fields:	Indigo dyed cotton article mainly softened in washing machines.
---------------------	---

Guide recipe:	<u>Exhausting method (washing machines):</u>
---------------	--

1 - 2 % BELFASIN OZK-TR o.w.f. (smooth touch)
5 - 8 % BELFASIN OZK-TR o.w.f. (ozone protection)

pH:	5 - 6
temperature:	40°C
time:	15 - 20 min.

HANDLING AND STORAGE

Storage stability 12 months under normal conditions.

Storage and transport It is very important to maintain storage temperatures over +10°C and below +35°C. In some cases, when temperature reach 35°C lump formation have been observed.

Further remarks References to measures in case of accidents and fires as well as further information about ecology, toxicology, transport and storage are given in the separate Material Safety Data Sheet.
