H&M CHEMICAL RESTRICTIONS

Dear Sirs,

as already known, the H&M Chemical Restrictions apply on the textile products and textile articles supplied to H&M. That's why sub-suppliers cannot give any guarantee (e.g. because of legal reasons) on the textile materials finished by you and supplied to H&M.

Nevertheless we hereby declare that the products manufactured by CHT Switzerland and supplied to you

TUBANTIN RED BWS TUBANTIN DARK BLUE R

are suitable for coloration of textile material which has to fulfill the requirements of the H&M Group Chemical Restrictions 2018:

- the Restricted Substances List (RSL) for Apparel, Accessories, Footwear, Home Interior and Textile Products (edition January 2018) and
- the Manufacturing Restricted Substances List (MRSL), edition from January 2018.

That means that textile material dyed or printed with the above listed products according to the application procedures for dyeing recommended by us (including the used auxiliaries, applied temperature modus and time regime, number of rinsing baths and kind of after treatment procedures) will comply with the requirements of H&M that depend on the used textile dyes or pigments. Other parameters of influence like material, other used dyes and pigments, chemicals and auxiliaries, technical performance of the processes etc. must be ensured by you.

If you have further questions do not hesitate and contact us.

Kind regards

CHT Switzerland AG

Dr. Elena Schramm
