do not contain in their composition as intentional component⁽¹⁾ any of the substances included in the “Manufacturing Restricted Substance List – Zero Discharge Hazardous Chemical Programme – November 2019” in concentration above the values given in MRSL – Formulation Guidance Limit.

This declaration is based on our knowledge and technical information, tests, material safety data sheet and other documents that we have from our suppliers of raw materials.

Although we do not expect the presence of the substances related on ZDHC Programme in these products, ASUTEX do not specifically analyse all of them in chemical product, so we give this declaration as guidance and without responsibility from our part.

- (1) Under various environmental protection and product safety regulations, directives and standard “intentionally introduced” means “deliberately utilized” during the manufactures of the components and/or for the formulations of a material or component where its continued presence is desired in the final product to provide a specific property, appearance or quality.

This certificate is valid for the edition of “MRSL – ZERO DISCHARGE OF HAZARDOUS CHEMICALS PROGRAMME – v2.0 – November 2019”. In case of a new edition of this standard, the certificate must be renewed under your request.
