BENETTON RESTRICTED SUBSTANCES LIST – September 2017

ASUTEX declares that, according to the best of our knowledge, the products:

- **ACTIVANTE PREND CL**
- **MORDIENTE M NEW**

fulfil PRSR-detail, related to finished or semi-finished product, provided that the appropriate application according technical data sheet and consideration of our recommendations are followed.

The products mentioned before have ammonium compounds in their composition (see MSDS), this ammonium can be decomposed in ammoniacal nitrogen depending on the media. It is not possible to say the % of product remaining on treatment bath because these products can be applied by different procedures and various concentrations.

Therefore, although **ACTIVANTE PREND CL** and **MORDIENTE M NEW** do not contain in their composition as intentional component⁽¹⁾ the substances listed chapter 1.2 in MRSL-detail of BENETTON RESTRICTED SUBSTANCE LIST, these substances are aimed to be tested on wastewater and sludge, so it is responsibility of the user to verify the compliance.

This declaration is based on our knowledge and technical information, material safety data sheet and other documents that we have from our suppliers of raw materials.

⁽¹⁾Under various environmental protection and product safety regulations, directives and standard "intentionally introduced" means "deliberately utilized" during the manufactures of the components and/or for the formulations of a material or component where its continued presence is desired in the final product to provide a specific property, appearance or quality.

This certificate is only valid for BENETTON RESTRICTED SUBSTANCES LIST – September 2017. In case of a new edition of this standard, the certificate must be renewed under your request.
