

Broanti 2PA

Anti-stain Agent

Broanti 2PA is high concentrated anti-indigo dye stain agent to be used in denim garment washing application. It is a complex polymers & surfactants which used to prevent the Indigo dye re-deposition on cotton and show superb anti stain effect for polyester & others synthetic fiber.

Characteristics

- Appearance : White powder form
- Chemical Nature : Non-ionic polymers and surfactants

Advantages & Features

- Outstanding anti-stain effect on cotton and many type of synthetic fiber
- Can be pre-diluted with room temperature (30 – 35°C) water to form a stable solution or with warm water (40 – 50°C) for faster dilution
- Does not disrupt cellulase abrasion performance and have low color pull feature
- Enhance cellulase performance during denim washing:
 - High grain
 - High contrast
 - Grey cast

Application

- Ready-to-use product, can add directly into the washer, with dosage ranging from 0.1 g/L to 1.0 g/L
- A right complex powder anti stain agent re-formulate with powder cellulase or amylase will enhance enzymes performance and lower down indigo stain during washing

Sales & Technical Center:

BroadTex Malaysia Sdn Bhd

No. 46, Jalan Putra Permai 10/3E, Putra Heights,
47650 Subang Jaya.

Head Office & Production:

BroadTex Biotech Co., Ltd

8th/13th, No.30 Taishi Industry Area, Jiantai Road, Dongchong
Town, Nansha District, Guangzhou, GD, PRC

Product Storage

To prolong the product shelf life, kindly store the **Broanti 2PA** at 35°C or below in a sealed container.
