BroaAse Stonewash

Formulated Powder Cellulase

BroaAse Stonewash is formulated with new generation neutral cellulases, complex buffer chemicals, lubricant, spandex protector, superior anti-stain agents and desizing agents. The product is designed to produce premium denim wash look on denim garments with one bath one step process (without desizing step) which you no need to add warm water, anti stain agent and pumice stone.

Characteristics

- Appearance: Light brownish powder form

Advantages & Features

- Combine both desizing and Cellulase washing treatment in a single bath process
- Well performance at low temperature, as low as 23°C
- Almost fully replace pumice stone
- Save time, save water, save energy and save chemicals
- Provide good grain
- Superb Low stain, without extra anti stain agent
- High contrast
- Good hand feel
- Good abrasion performance
- With present of Spandex protector which is gentle to spandex

Application

Dosage:

- Denim Garments (Belly washers/Front loaders): 0.75% - 2.0% owg
